## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE  
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## ICPSR PROCESSING NOTES FOR #21600

*National Longitudinal Study of Adolescent to Adult Health (Add Health), 1994-2008*  
[Public Use]

### DS8: Wave III: In-Home Questionnaire, Public Use Sample

- 1. Stata Limitations:** Due to Stata limitations, character variables **H3ED16, H3ED17, H3ED19, H3ED20, H3ED22, H3ED29, H3ED30, H3LM10, H3LM11A, H3LM11B, H3LM11C, H3LM25, H3LM26A, H3LM26B, and H3LM26C** do not contain value labels within the Stata files.
- 2. Variable Description/Value Label Discrepancy:** Question text indicates that variables **H3TO41** and **H3TO42** measure the “number of times” a respondent consumed more than the specified number of alcoholic drinks on a single occasion. Through previous communication with the investigators, ICPSR has confirmed that value labels for these variables should indicate “times” rather than “drinks” in both the dataset and the P.I. Codebook/Questionnaire.
- 3. Documentation Discrepancies:** Variables **PRETEST3** and **PRISON3** are listed as ‘PRETEST’ and ‘PRISON’ in the P.I. Documentation.
- 4. Character Variable Codes:** For character variables **H3ED16, H3ED17, H3ED19, H3ED20, H3ED22, and H3ED29**, please see the *Classification of Instructional Programs 2000 Edition* codes provided on pages 244 to 282 of the P.I. Codebook/Questionnaire.
- 5. Text Abbreviations:** Several variables feature coded question text abbreviations that refer to extended text located at the beginning of the questionnaire sections. For variables **H3WP1** and **H3WP4**, please refer to the first page of Section 3 (page 86) in the P.I. Codebook/Questionnaire. For variables **H3WS1A, H3WS1B, H3WS1C, and H3WS1D**, please refer to the first page of Section 5 (page 127) in the P.I. Codebook/Questionnaire.
- 6. Undocumented Codes:** Character variable **H3MN13A** features open-ended string responses; numeric values ‘-1’, ‘-2’, and ‘-3’ are undocumented codes that have not been labeled. No information was provided.
- 7. Missing Value Designations:** Due to limitations in the statistical packages, values ‘9999996’, ‘9999997’, ‘9999998’, and ‘9999999’ have not been designated as missing for the following character variables: **H3LM10, H3LM11C, H3LM25, and H3LM26A**.
- 8. Truncated Value Labels:** Due to limitations in the statistical packages, several variables feature truncated value labels. Please see the P.I. Codebook/Questionnaire for full value labels.

### **Variable Description and Frequencies**

**Note:** Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

## PARTNER: PARTNER SAMPLE-W3

Partner Sample. When the Wave III field work began, approximately one half of the fielded Add Health respondents were randomly flagged to be part of the Partner Sample. When a respondent with PARTNER = 1 was interviewed and if the respondent had an eligible relationship, the respondent was asked to recruit his/ her partner for the study. This relationship is identified as the Couple Sample (CP) relationship in Section 19. Additional information about the Couple Sample is available in the document "sect19 descriptions.pdf."

## PRMOM: MOTHER FIGURE AT LAST INTERVIEW-W3

Mother Figure at Last Interview. Variables PRMOM and PRPOP were created from responses to the Wave I or II household roster information. If a respondent indicated that he/she lived with a mother figure, but not a father figure, then the value for the father figure would be coded as missing and likewise if they lived with a father figure and not a mother figure. When a respondent did not list both a mother and father figure, then he/she was asked the questions "Who in your household acts a mother figure?" and "Who in your household acts as a father figure?" which had no one as an allowable response. Respondents who lived alone at the time of their last interview also received codes of (99) (no one) for PRMOM and PRPOP.
